

SHIHO NAGANO

Front End Developer

TEL: (236)-838-5407 Email: shihonagano9797@gmail.com LinkedIn: [shiho-nagano](#) GitHub: [Shiho317](#) Vancouver, BC, Canada

SUMMARY

A front-end developer with a background in healthcare and a passion for learning, designing, programming, and building tech products. I am a reliable, fast learning, self-motivated, and hardworking team player who enjoys solving challenges and tackling obstacles. I am confident that my solid work ethic and knowledge of web development and coding will make me a great asset to your team.

SKILLS

Languages: Javascript, React, Redux, Next.js, TypeScript, Node.js, Express.js, Angular.js, Apollo, python, PHP,

Database: graphQL, MySQL, PostgreSQL, Firebase, MongoDB

Other Technologies: HTML, CSS, Scss, JQuery, Git/Github, Figma, Inkscape, TailwindCss, Bootstrap, MarterialUI, styled-components, Framermotion

PROJECTS

1. [SUKI SUSHI](#) - Map application which provides the location of sushi restaurants in Vancouver, CA. Users can select a pin to see restaurants' details and add them to their favorites.
- Technical Specifications: React, Node.js, Express.js, Css, graphQL, Apollo, MongoDB
2. [U Watch](#) - E-commerce website and marketplace for various wrist watches. Created using redux toolkit and firebase to manage item data.
- Technical Specifications: React, Redux, Scss, Material-Ui, firebase
3. [Seattle DJ Website](#) - A website that promotes and highlights a client who is a DJ in Seattle, US. Visitors can see his profile and listen to samples of his music. Created with JSON for making it easy to update.
- Technical Specifications: CSS, Next.js, Node.js, Figma
4. [My Portfolio](#) - My personal portfolio website that describes myself and highlights some of my projects. Utilizes my self created contact form that enables users to contact me with any inquiries from within the website. Users receive automated replies via email confirming receipt of their inquiries.
- Technical Specifications: Typescript, React, styled-components, framer-motion, Figma
5. [Weather App](#) - A web application that displays the current weather, including the hourly and weekly weather and temperatures for any city in the world. The background display of the app changes depending on both the current weather status and the time of day.
- Technical Specifications: Next.js, Tailwind Css, openweather API
